Company Recruitment Team

Job Application for Junior Software Engineer

Dear reader of this presentation

About Me

I am insightful, tenacious and curious. I am always interested in learning, and improving. I like to understand, and make sense of things. The more I understand something, the easier it is for me to learn new things.

Why 5CA?

I consider that this is a good opportunity to work, due to the wide range of projects that your company has, and its size. I would like to enter a new project, grow within the company, and be useful.

Why Me?

I am looking for a good remote job, where I can give my best, and build a good future for myself.

Sincerely, Alejandro

Iglesias Calvo Alejandro
